

ANIRUDDHA SAINI

AI/ML Engineer · AI Product Builder · Automation Systems

+91 9821179384 | aniruddhasaini@gmail.com | [LinkedIn](#) | [GitHub](#) | Gurgaon, Haryana

PROFESSIONAL SUMMARY

AI/ML-focused Computer Science student specializing in deep learning, LLMs, RAG pipelines, and generative AI. Built and launched a full-stack e-commerce platform end-to-end as co-founder, demonstrating product execution beyond academic work. Currently building AI-powered products and automation systems. Seeks to apply applied ML and agentic AI skills in a high-impact internship or product role.

TECHNICAL SKILLS

AI & Machine Learning: Python, PyTorch, Deep Learning (CNNs, RNNs, Transformers, GANs, Autoencoders), Classical ML, NLP, LLMs, RAG Pipelines, Vector Databases, LangChain, Generative AI, Fine-Tuning (LoRA/PEFT), Hugging Face, YOLO, Mask R-CNN, Diffusion Models, Prompt Engineering, API

Development & Tools: HTML, CSS, JavaScript, TypeScript, PostgreSQL, UIX, Vercel V0, Next.js, n8n, Webhooks, REST APIs, Supabase, WordPress, Git, Google Colab, FastAPI, Supabase pgvector, React.js

Product & Business: Product Thinking, Sales Automation, Digital Marketing, Lead Generation, Feature Scoping, AI Workflow Automation, Go-to-Market Execution, D2C, Data-Driven Decision Making

EDUCATION

B.Tech – Computer Science & Engineering (AI/ML Specialization) | Aug 2023 – Present

Manipal University Jaipur | Dean's List Award | Student Excellence Award

- Relevant coursework: Deep Learning, Neural Networks, Computer Vision (YOLO, Mask R-CNN), Natural Language Processing, Generative AI, Data Structures & Algorithms, Cybersecurity, Machine Learning, Web Technologies.

EXPERIENCE

Co-Founder & Product Lead | [Litify](#) - [litify.shop/](#) | May 2025 – Present

- Architected and deployed a full-stack e-commerce platform for room décor (Posters, Tapestries, Rugs, Lights etc.) from scratch — product catalog, cart system, coupon system and checkout flow — using WordPress and Elementor Pro, custom frontend components, and third-party payment integration- Razorpay.
- Owned the complete product lifecycle: ideation, UI/UX decisions, conversion funnel analysis, and iterative improvements based on real customer behavior data.
- Executed end-to-end go-to-market strategy including brand identity, digital marketing, and customer acquisition.
- Gained hands-on experience with the operational realities of launching and iterating a consumer product — inventory, fulfillment, and customer feedback loops.

PROJECTS

ProctorVision - AI-Powered Exam Integrity and Proctoring Platform | [React](#), [FastAPI](#), [Python](#), [CV](#), [YOLOv8](#) |

- Architected an automated exam proctoring platform integrating MediaPipe FaceMesh (478 3D landmarks) and YOLOv8 to cross-verify gaze baseline offset thresholds and detect active cell phones or unauthorized external assistance.
- Built custom real-time computer vision heuristics including Head Pose Estimation via OpenCV solvePnP (Euler angles) and speech verification via Mouth Aspect Ratio (MAR > 0.4) over streaming WebSocket frame connections, also detects tab switching.
- Structured modular asynchronous message handlers in FastAPI to compute live session integrity scores (0-100 scale) from weighted violation counts and programmatically generate comprehensive PDF metrics reports at session end, while Proctor gets live updates on students' risk and evidence screenshots of any sort of violation.
- Deployed live on HFspaces- [Live Demo](#) - <https://anirudhsaini-proctorvision.hf.space/>

Cadence - Enterprise Goal-Management System | [React 18](#), [TypeScript](#), [Supabase](#), [PostgreSQL](#), [Tailwind CSS](#) |

- Engineered an enterprise-grade OKR lifecycle management platform utilizing a serverless zero-custom-backend layout
- Enforced data isolation and zero-trust perimeter security directly at the database layer using PostgreSQL Row-Level Security (RLS).
- Programmed database-level custom trigger validations for cascading target structural weight computations and automated scoring algorithms against 5 unique Units of Measure (UoM) variants.

- Integrated transactional notification infrastructure through Resend API architectures to trigger configurable escalation rules, action audit logs, and organization-wide real-time analytics graphs.
- Deployed live on Vercel- [Live Demo](https://cadence-growth.vercel.app/) - <https://cadence-growth.vercel.app/>

Portfolio.AI – AI Twin Portfolio (RAG-Powered Developer Portfolio) | [Next.js](#), [FastAPI](#), [Supabase pgvector](#), [Groq Llama](#), [SentenceTransformers](#) |

- Built an interactive AI portfolio powered by a Retrieval-Augmented Generation (RAG) pipeline, allowing visitors to ask natural-language questions about projects, skills, and experience.
- Implemented semantic search using vector embeddings and Supabase pgvector to retrieve relevant context before LLM generation, improving response relevance and accuracy.
- Integrated an AI avatar with voice synthesis and deployed the full-stack application across Vercel, Hugging Face Spaces, and Supabase.
- Deployed live on Vercel— [Live Demo](https://ai-portfolio-anirudh.vercel.app/) - ai-portfolio-anirudh.vercel.app/

ATSense – AI Resume Analyzer | [Gemini API](#) · [JSON](#) · [Prompt Engineering](#) |

- Built an LLM-powered ATS resume analyzer using Google Gemini 2.0 Flash; engineered structured JSON prompts to extract match score, skill gaps, resume strengths, and AI-rewritten bullets against any job description.
- Implemented a custom JSON parser with error handling and a modular backend (gemini_utils, prompt builder, response parser); deployed live on Vercel— [Live Demo](https://atsense-analyse.vercel.app/) - <https://atsense-analyse.vercel.app/>

PetPal – Intelligent Pet Companion App | [Claude API](#) · [Supabase](#) · [LangChain](#) | April 2026 – Present

- Building a breed-aware AI pet companion app combining a high-fidelity pet simulation (Pet Twin) with AI health triage, personalized shopping, emotional memory tooling, and community features.
- Architected for long-term scalability with product-first design philosophy; integrating Claude API for conversational intelligence and Supabase for real-time data management.
- Landing page deployed on Vercel - <https://pet-pal-love.vercel.app/>

SpamSentry – SMS Spam Classifier | [PyTorch](#) · [HuggingFace](#) · [Streamlit](#) |

- Fine-tuned DistilBERT on the SMS Spam Collection dataset (5,574 samples) for binary spam classification using transfer learning; achieved 97%+ accuracy with custom PyTorch tokenization pipeline.
- Implemented encoder-decoder classification head on pretrained DistilBERT; trained with AdamW optimizer and CrossEntropyLoss over 3 epochs on CPU with HuggingFace Trainer API.
- Deployed a live interactive web app on Streamlit Cloud — [Live Demo](https://spamsentry-scam-detector.streamlit.app/) - spamsentry-scam-detector.streamlit.app/

CERTIFICATIONS & ACHIEVEMENTS

- [Stanford Machine Learning Specialization – Coursera \(3 course\)](#)
- [Elite Certification: Introduction to Machine Learning – NPTEL, IIT Madras](#)
- [Elite + Silver Medal Certification: Deep Learning – IIT Ropar](#)
- [Neural Networks and Deep Learning – DeepLearning.AI](#)
- [Generative AI Engineering with LLMs: Fine-Tuning Transformers – IBM, Coursera](#)
- [Fundamentals of AI Agents using RAG and LangChain – IBM, Coursera](#)
- [Generative AI Applications with RAG and LangChain – IBM, Coursera](#)
- [Design and Analysis of Algorithms – NPTEL](#)
- Manipal University Dean's List Award
- Manipal University Student Excellence Award
- Model United Nations Awardee – Public Speaking & Diplomacy

LEADERSHIP & ACTIVITIES

Senior Coordinator, Litmus Literature Club, MUJ | **Football Team**, MUJ | **Lead Pianist** in College Band
